

ALTERNATIVES TO STANDARD IMMUNIZATIONS- HOMEOPATHIC NOSODES

INTRODUCTION:

This kit provides homeopathic nosode remedies for individuals or families choosing alternatives to conventional immunizations. Pennsylvania law states that all school children must be immunized with only 2 exceptions:

- 1) Children where immunizations are medically not advised due to potential for negative health consequences.
- 2) Children whose parents have refused immunizations due to religious or philosophical beliefs.

Both these exceptions require signed documentation for public school records in order for child to attend public schools.

Homeopathic medicine is offered as an alternative support in those situations stated above which prevent families from using standard immunizations. Homeopathic support in preventing infectious diseases are believe to be completely safe and have not been shown to be the cause of any infectious disease-linked illnesses. Unfortunately, there have been no systematic long term studies to prove the efficacy of homeopathic medicine as a substitute for standard immunizations. In clinical practice however, homeopathic medicine has been used for decades not only in the prevention of infectious epidemics, but also in the treatment of infectious diseases.

The South Hills Integrative Wellness Center supports Pennsylvania Law. We provide this homeopathic kit as a service to our patrons with religious or philosophical beliefs, or medical contraindications for the use of standard immunization procedures. **The provision of this kit does not imply any guarantee from the South Hills Integrative Wellness Center, as to provide immunity or prevention of the diseases that correspond with each homeopathic nosode, nor to serve as a recommended replacement for standard immunization procedures.**

HOMEOPATHIC KIT REMEDIES AND THEIR IMPLICATED USE:

Diphtherinum	--Diphtheria
Pertussin	--Pertussis
Clostridium Tetani	--Tetanus
Morbillinum	--Measles
Parotidinum	--Mumps
Rubella	--Rubella
Meningococcinum	--Meningitis
Influenzinum	--Influenza
Variolinum	--Chicken Pox
Scarlatinum	--Scarlet Fever
Poliomyelitis	--Polio
Hepatitis B	--Hepatitis B

HOMEOPATHIC KIT DOSING SCHEDULE:

The procedure for homeopathic immunization support should begin at age 3 months during an illness free period. **Each individual remedy should be given as 3 pellets three times a day for 3 days.** There should be no food or drink given by mouth within 30 minutes before or after each dose, and each dose should put in the lid and poured into the mouth without any physical contact with the pellets. **After completion of the 3 days of dosing, a 10 day period should pass before introduction of the next remedy dosed the same way for 3 days, etc.** Beginning on a Sunday every two weeks can help in keeping track of your schedule. A total of all 12 remedies should be given over a 6 month period until the series is completed. For prevention, this series should be repeated once a year until the age of 6, again at age 9, and completed again at age 12.

In the event of a known exposure to an outbreak of any of the above diseases, **the appropriate nosode should be given as 3 pellets daily for 3 days, then once weekly as long as the potential for exposure exists.**

Note: Remedies should never be poured back into stock bottle once they have fallen out or been touch. Avoid exposure of remedies to strong aromatic odors (camphor, eucalyptus, peppermint, etc.) and chemical fumes (paint, solvents, gasoline, household cleaners, etc.)

OTHER INFORMATION:

Consult your Naturopathic Physician for medical advice regarding your health, the prevention and treatment of common illnesses and/or chronic diseases. Below are some recommended reading materials and a resource list we encourage you to explore to become informed about the importance of the vaccination issue(s). Please note that this list is not all inclusive as there are many other informative resources available, and any addition you can provide to this list is most appreciated.
